PARK VIEWS

Celia Chu always strives to make her interiors work for the building as well as her client's lives. So when it came designing this brand new four bedroom penthouse apartment in a brand new building in a prestigious area of Taipei, Celia immediately thought about the views over the park below, the flow of the space and how it could work by opening up and zoning each new area, keeping the whole penthouse light, bright, but most importantly, connected to one another. As Celia does in her luxury hotel designs, she layered each space and created key design focal points including a stunning bespoke glass fireplace made by British craftsmen.

This penthouse apartment was designed by Celia Chu & Associates and completed in 2019.

Photography by Oliver Marceny.
